Academic Positions

2026-Present	Great Minds Postdoctoral Fellow, Institute for Economic Research and Policy (ERP-HSG), University of St. Gallen
2025-2026	Postdoctoral researcher, University of St. Gallen

Education

Ph.D. in Economics, Erasmus Universiteit Rotterdam-Tinbergen Institute, January 2026
Thesis: *Setting (and Mapping) Expectations: Essays on the Measurement of Beliefs, Learning through Experience and Decision Making under Uncertainty*
Advisors: Pr. Aurélien Baillon, Pr.dr. Chen Li

Visiting Ph.D. student, HEC Paris, April-July 2023
Host: Pr. Mohammed Abdellaoui

M.A. Mathematics: Applied Focus, Pontificia Universidad Javeriana, 2018-2021

M.Res. Economics: Econometric focus, Université Catholique de Louvain, 2013-2016

B.A. Psychology, Universidad de los Andes, 2008-2013

B.A. Economics, Universidad de los Andes, 2007-2012

Working Papers:

Learning Gaps? Attitudes and Beliefs Under Described and Experienced Signals
David Gonzalez-Jimenez
`https://ssrn.com/abstract=6479538`
We show that ambiguity attitudes vary systematically with the informativeness of available signals, using an experimental design that varies informativeness and a method that separately measures attitudes and beliefs. When the signal–event association must be inferred from sampling (experience), aversion decreases as signals become more informative, and insensitivity drops sharply under the strongest signal. When the association is fully known (description), aversion is essentially unchanged, while insensitivity shows at most a modest response. The two conditions

also differ along both dimensions, with opposite signs: aversion is lower under experience while insensitivity is higher. Separately measuring attitudes and beliefs proves consequential: the two can move in different directions, and failure to separate them overstates conservatism in updating. For beliefs, subjects in experience place a higher weight on signal information than those in description, bringing their updating closer to the Bayesian benchmark.

A betting rule to incentivize the elicitation of continuous distributions
Aurélien Baillon, Thomas de Haan and David Gonzalez-Jimenez
We introduce a family of incentive mechanisms, called *betting rules*, to elicit continuous distributions. They offer two behavioral advantages: they incentivize accurate reporting of beliefs even for non-expected utility maximizers, and they can be explained in plain language. Within the family of betting rules, we discuss the tradeoff between simplicity and strength of incentives.

`https://doi.org/10.1016/j.jebo.2024.106868`

Prior experiences are crucial in shaping risk prevention behavior. Previous studies have shown that experiencing a simulated phishing attack (a "phishing drill") reduces the likelihood of clicking on unsafe links and disclosing one's password. In a large field experiment involving 670 small and medium-sized enterprises (SMEs) and their 33,000 employees, we examined the impact of experience on individuals' ability to detect cyber-security threats, and whether this effect persisted over several months. We collected data at both the company and individual levels, including risk preference, time preference, and trust. Our findings indicate only a non-systematic, short-term effect of previous phishing emails on clicking behavior. A cluster of individuals with greater patience, trust, and risk seeking was more likely to click on phishing links in the first place but then also more likely to benefit from phishing drills.

Research and Teaching Fields

- **Primary Field:** Behavioral Economics
- **Secondary Fields:** Microeconomics, Experimental Economics, Applied Theory

Presentations and Conferences

2026	Workshop in honor of Peter Wakker Rotterdam, FUR 2026 Alicante, ESA European Meeting 2026 Barcelona
2025	D-TEA 2025, LACEA-LAMES BRAIN Workshop , Ph.D. Lunch Seminar EUR, Behavioral Economics meeting St. Gallen
2024	RisLAB Summer School Rabat, ADA 2024 Helsinki, MBEES-MBEPS 2024 Maastricht, Ph.D. Lunch Seminar EUR
2023	GATE Lyon, Ph.D. Lunch seminar Tinbergen Institute, Ph.D. Seminar EUR, HEC Ph.D. day, SPUDM 2023 Vienna
2022	FUR 2022 Ghent, MBEES-MBEPS 2022 Maastricht, Ph.D. Lunch Seminar EUR , Ph.D. Day EUR

Teaching Experience

2020-2025	Bachelor Thesis supervision, Erasmus University Rotterdam
2020-2025	Master Thesis supervision, Erasmus University Rotterdam
2022-2024	Applied Behavioral Economics Seminar (Master) Lecturer, Erasmus University Rotterdam
2020-2024	Intermediate Behavioral Economics (3rd year Bachelor) Teaching Assistant, Erasmus University Rotterdam
2020-2022	Intermediate Behavioral Economics (3rd year Bachelor) Course coordinator, Erasmus University Rotterdam

Non-Research Experience

2019-2020	Data Analyst, Direccion Nacional de Impuestos y Aduanas DIAN (Tax and Revenue Authority of Colombia), Bogota, Colombia
2017-2019	Data Analyst, Secretaria Distrital de Movilidad (Transit and Traffic authority) Bogota, Colombia
2012-2013	Jr. Consultant in Market Research, Quala S.A., Bogota, Colombia

Scholarships, Honors and Awards

2026 Great Minds Postdoctoral Fellowship, University of St. Gallen (Basic Research Fund, GFF), CHF 205,524

2013-2015 Colfuturo Scholarship to do the Research Master in UCLouvain

Refereeing activity

Journals	Theory and Decision

Ancillary activities

2022-2023	Ph.D. Board for the Applied Economics department
